Elevating Modern Living with
Innovative Designs

SHREE YOGI ENTERPRISE

An ISO 9001 : 2015 certified company

“YOGI'S PRODUCT'S” is more than just a hardware manufacturing company. We embody an approach to decoration that values detail and recognizes the impact that an accessory can make. Each product undergoes an extensive development process before being crafted by our production team.

Our daily efforts focus on innovating and advancing the products available in the market, as well as enhancing the finishing touches on furniture. Our goal is to excite builders, interior designers, and customers about their new homes and the added design and functionality our products provide. We take joy in the meticulous attention to detail.

Our products have been highly appreciated by the market, with a consistent demand from our customers. Our transparent business practices enable us to serve a broad range of clients."

 **SERVICES**

We are committed to building and maintaining strong relationships. Our prompt delivery and efficient service have set new standards for dealer and customer engagement within the industry.

Available Finishes

We have wide range of finishes that make products attractive, unique and modern looks.

- | | | | |

AN EXEMPLARY FIT THAT
DEFINES ITS INDIVIDUALITY.

Design Innovation

Developing and creating new designs has always been a challenging task, regardless of the industry. It takes great dedication and determination to never give up on one's dreams. Our passion and relentless hard work drive us forward as we continue striving to create better spaces. Our ultimate goal is to produce designs that seamlessly balance elegance and functionality.

From Raw Material to Finish

Our products are the result of careful planning, skilled workmanship, and well-defined processes. Consistency and attention at every stage ensure the quality and finish that set our products apart.

Stage 1: Scrap Material Quality Check

Description: The production process begins with the careful selection of high-quality brass scrap. At this stage, the purity of the metal is strictly tested to ensure the final product achieves maximum strength and durability.

Stage 2: Casting Rods from Scrap Material

Description: The selected brass is melted at high temperatures in a furnace and then cast into long cylindrical rods. These rods provide the essential foundation for the subsequent machining process.

Stage 3 :
Machining Operation

Description: At this stage, brass rods are cut and carved into precise shapes for tower bolts or hinges using lathe machines & drilling machine. Maintaining design accuracy is critical throughout this process.

Stage 4 :
Technical Check

Description: Following the machining process, every part undergoes a meticulous inspection of its dimensions and fitting. This ensures that each product is manufactured exactly according to the established standards.

Stage 5 :
Buffing & Polishing

Description: To make the product attractive and shiny, it is polished using wheel buffing. This process removes roughness from the metal surface and gives it a premium finish.

Stage 6 :
Mechanism Check

Description: Before final packaging, the movement of the tower bolts and the locking mechanism of the hinges are thoroughly tested. This ensures that every part functions smoothly and operates perfectly for the end user.

Stage 7 : **Plating Finishing**

Description: After the cleaning process, the tower bolts undergo electroplating to apply different finishes such as Antique Brass, Satin, Chrome, or Black powder coating. This layer not only enhances the visual appeal but also provides long-lasting protection against corrosion and rust.

Stage 8 : **Quality Check**

Description: This is a comprehensive final inspection where each tower bolt is examined for surface defects, uniform plating, and structural integrity. We ensure that every piece meets the highest quality standards before it moves to the packing department.

Stage 9 : **Packing-Polythene Non-Woven Bag**

Description: To prevent scratches during transit, individual brass tower bolts are carefully wrapped in high-quality polythene or soft non-woven bags. This ensures that the premium polished or plated finish remains untouched until it reaches the customer.

Stage 10 : **Box & Carton Packaging**

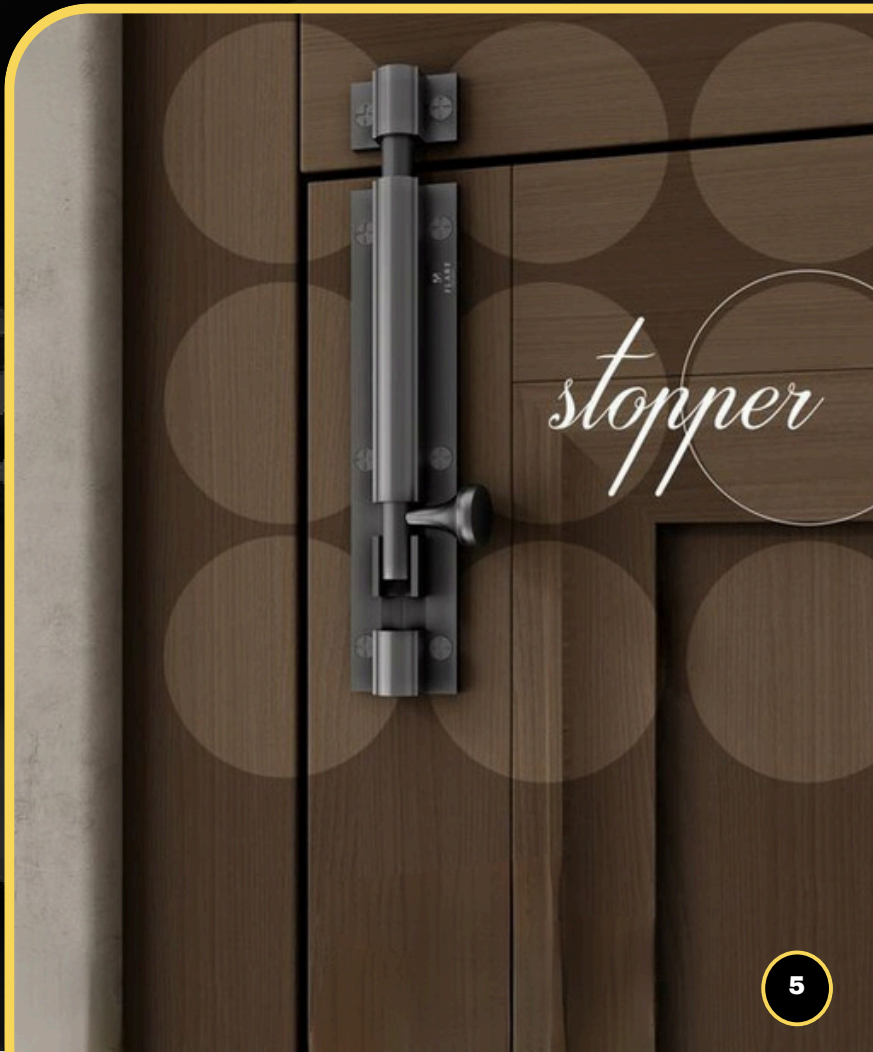

Description: In the final step, the wrapped products are placed into branded inner boxes along with the necessary screws and accessories. These boxes are then securely packed into heavy-duty corrugated cartons for safe bulk transportation and global shipping.
